

FIADYS

Carmen Jordá Sanz

PhD in Law, Government and Public Policy from the Autonomous University of Madrid, where she also received training in Psychology and Law. She has a solid postgraduate background in Criminology, Criminal Analysis and Investigation, Digital Evidence, and Cybercrime prevention. She has developed an extensive national and international research career, participating in numerous projects funded by the European Commission, Spanish ministries, and public bodies in the fields of security, organized crime, and the impact of technology. For several years, she worked as a European researcher on R&D projects, as part of multidisciplinary teams in psychology, computer engineering, and criminology. She is currently Director of the Department of Criminology and Security at Camilo José Cela University and leads the TECSEC research group, with projects focused on artificial intelligence and the criminological analysis of online data. Her profile combines research, teaching innovation, knowledge transfer, and scientific dissemination, with a strong presence in the media and in publications aimed at the social impact of technology and security.

Research Lines:

Organized crime, cybersecurity, artificial intelligence applied to criminology, corporate crime, online hate speech
